EDUCATION

University of North Texas

Ph.D. in Information Science

Denton, TX

Jan 2024 – Present

Fudan University

M.S. in Computer Science

Shanghai, China

Sep 2020 – Dec 2023

Donghua University

B.S. in Computer Science

Shanghai, China

Sep 2013 – Jun 2017

RESEARCH INTERESTS

Diffusion-based Image Generation

Portrait Relighting

Illumination Estimation

PUBLICATIONS

- Peng Zhao, **William Jing**, Juyan Ba, Kairui Feng, Xuanhong Chen
FaceProbe: Recovering HDR Environment Map via Masked Diffusion and Physical Preference (NeurIPS2026 Poster).
Recovers HDR environment maps from portraits using masked diffusion and relighting-based preference optimization.
- **William Jing**, Xuanhong Chen
First-author manuscript — ICLR 2027, under review
Controllable portrait relighting with high visual fidelity and content preservation.

EXPERIENCE

Applied Scientist Intern

Amazon, Inc

Jun 2025 – Aug 2025

Seattle, WA

- Developed and implemented a novel attention mechanism within the VAE decoder to mitigate structural distortions and artifacts in generative models.
- Researched high-fidelity image generation for advertising applications, focusing on enhancing content preservation and realism in generated ad creative.

Machine Learning Research Intern

OPPO Research Institute

Nov 2021 – Mar 2022

Shanghai, China

- Collaborated on deploying AI-driven action recognition models to automate real-time monitoring of operational sequences on OPPO smartphone assembly lines, ensuring workflow compliance, reducing errors by 15%, and enhancing production efficiency through a video-based understanding of worker actions.

TECHNICAL SKILLS

Languages: Python, C/C++
